ESC - PRISM

FOR FEDERAL AGENCIES

ESC, the division of the Department of Transportation that developed Delphi, now helps you simplify federal acquisition. We have teamed with Compusearch Software Systems, Inc., to implement a SOA-based (Service Oriented Architecture) integration to their leading federal acquisition solution, PRISM.

SOA is the leading technology for robust, dynamic integration of business processes. Compusearch's PRISM has over 75 federal agencies as customers, with over 40,000 users in total, making it the widest used acquisition system in Federal Government. This marriage has resulted in an optimized Federal Acquisition system with additional benefits for procurement professionals, requisitioners, and accounting personnel.

From requisitioning to closeout, ESC's PRISM system guides procurement professionals through the acquisition process, minimizing data entry and maximizing efficiency through electronic routing, workflow and workload management. In addition, the integration between Delphi and PRISM enhances Spend Management and allows real-time data look-up between the applications, including real-time checking of funds availability. ESC's integration of Delphi and PRISM simplifies your work by eliminating dual data entry and the possibility of keying errors.

For example, when a PRISM requisition is created, a commitment is created in Delphi. The entry of a PRISM contract will also create an obligation in Delphi.

ESC - PRISM Added Value

- *Shared Look-Up Tables*
  - *Vendors*
  - *Requisitions*
  - *Purchase orders and contracts*
- *Shared Data*
  - *Accounting code segments*
  - *Projects/tasks**
  - *Expenditure type**
  - *Expenditure organization**
  - *USSGL transaction account code*
  - *Payment terms*
- *SOA Integration*
- *Economies of Scale – cost benefits for all users*
- *Help Desk Support 24/7*

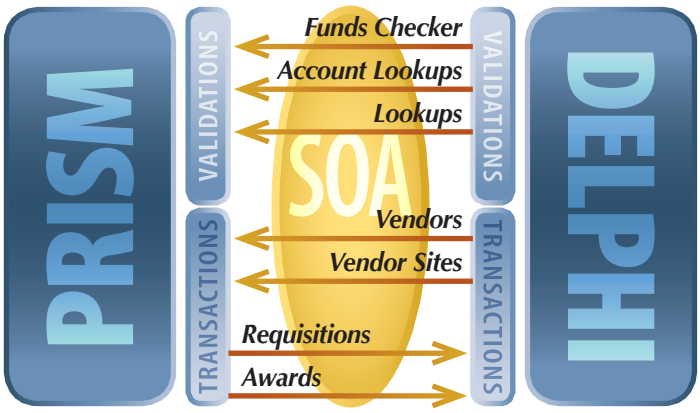
**pending functionality*

Standard Features

- *Full procurement life-cycle support from advanced acquisition planning through closeout*
- *21 award types prescribed by the FAR including IDIQ contracts and multi-vendor awards*
- *Web-based, 508 compliant*
- *Supports annual, multi-year, no-year appropriations*
- *Inter-Agency Agreements Module*
- *Federal Procurement Data System (FPDS) supported*
- *Different types of contracts, BPAs*
- *Complete support for FedConnect*

Service Oriented Architecture (SOA)

HIGH LEVEL FLOWS BETWEEN DELPHI AND PRISM



About Enterprise Services Center

In the 1980s the U.S. Department of Transportation dedicated the resources to create an unparalleled team of professionals dedicated to supporting the diverse business needs of its agencies. Today, called the Enterprise Services Center, this group assists numerous agencies with a wide range of business needs.

ESC has become a provider of choice because we take the time to learn our customer's business processes and requirements. We first pinpoint each customer's expectations and service level needs, then use the information we've garnered to develop an appropriate support strategy.

ESC has extensive experience cross servicing other federal organizations, to include the Government Accountability Office, National Credit Union Administration, Department of Commerce, Consumer Product Safety Commission, Department of Education, U.S. Air Force, Coast Guard, Social Security Administration, Transportation Security Administration, Office of Personnel Management, Commodity Futures Trading Commission, National Endowment for the Arts, General Services Administration, Department of Agriculture, Environmental Protection Agency, Institute of Museum and Library Services, U.S. Securities and Exchange Commission, and all of U.S. DOT.
